#### Fundamentals Level – Skills Module, Paper F6 (ZWE) Taxation (Zimbabwe)

Marks

3

#### 1 Mark and Ellen Mari

#### (a) (i) Consultancy services income:

The income from consultancy services should be treated as business income and taxed in terms of the Quarterly Payment Dates (QPDs) system. Ellen Mari should project her estimated consultancy fees as well as the related expenses for the year and then calculate the provisional taxable income. The amount is taxed at a corporate tax rate of 25% and 3% AIDS levy is also chargeable on the tax.

#### (ii) Calculation of the National Social Security Authority (NSSA) contributions for the year

The NSSA contributions payable by the employer are restricted to 3% of the gross monthly salary up to a maximum amount of US\$200 per employee per month.

|                                   | US\$ |   |
|-----------------------------------|------|---|
| (3% x 150) x 12 + (3% x 180) x 12 | 119  | 1 |
| (3% x 200 x 3) x12                | 216  | 1 |
|                                   | 335  | 2 |

#### (iii) Calculation of the withholding tax on the non-executive director's fees

The withholding tax is 20% of the amount received and the amount should be remitted to ZIMRA within 10 days after the payment date or accrual, whichever is earlier.  $\frac{1}{2}$ 

|                  | Withholding tax | Remittance date |     |
|------------------|-----------------|-----------------|-----|
| 20% of US\$1 800 | US\$360         | 13 March 2011   | 1/2 |
|                  |                 |                 |     |

#### 2 Just Toys (Private) Limited (JT)

#### (a) (i) Definitions of transfer pricing

Transfer pricing is the pricing of intercompany transactions which take place between affiliated enterprises or between the head office and branch. The transfer pricing process determines the amount of income that each party earns.

Transfer pricing is the manipulation of prices and other terms of trade between related parties on crossborder transactions.

Transfer pricing involves the pricing of goods and services outside the normal commercial parameters so as to gain some tax advantages.

Only one definition required 2

#### (ii) Transfer pricing aim

The transfer pricing rules aim to adjust prices in order to reflect an arm's length price which would have applied, had the transaction occurred under normal commercial circumstances between unrelated parties.

#### (b) (i) Amounts to be used for calculating the lease improvement allowances

#### Administration block

There is no lease improvement allowance as the actual cost incurred is less than US\$100 000.

1

2

|       | Warehouse building  | Marks    |
|-------|---|----------|
|       | Warehouse building<br>The lease improvement allowance is calculated based on US\$100 000, as there was no escalation<br>clause signed by the two parties before the completion of the building.                                       |          |
| (ii)  | Value added tax (VAT) implication of the hire purchase agreement  |          |
|       | VAT is payable on the actual cost of the two passenger vehicles before adding finance charges or other related hire purchase charges.   | 1        |
|       | JT can elect to claim special initial allowance (SIA). Alternatively, wear and tear can be granted on the total purchase price of the passenger vehicles, subject to the restriction of the purchase price to US\$10 000 per vehicle. |          |
| (iii) | Obligation to ZIMRA   |          |
|       | JT is obliged to request a tax clearance certificate (ITF 263) from the provider of the payroll function and the Avondale shop kitchen fittings supplier before making any payments for the services rendered.                        | 1        |
|       | In the absence of the tax clearance certificate, JT is obliged to deduct 10% of the invoice amount and remit it to ZIMRA within 10 days.  | <u> </u> |
|       |   |          |
| (i)   | Calculation of the capital allowances   |          |
|       | Since JT does not have a formal tax policy on fixed assets, wear and tear allowance is granted on   |          |

Since JT does not have a formal tax policy on fixed assets, wear and tear allowance is granted on qualifying assets. For immovable assets, the allowance is calculated on a straight-line basis while the reducing balance method is applied on the movable assets.

#### 3 Joe and Pat Lemon

#### (a) (i) Tax implications of the transfer

|      | The transfer of the immovable business assets between a wife and a husband is a deemed sale and hence capital gains tax would arise in the hands of Pat Lemon.                | 1                                |
|------|---|----------------------------------|
|      | Corporate tax would also be chargeable to Pat Lemon on the recoupment arising from the deemed sale.   | 1/2                              |
|      | The transfer of the movable assets is also a deemed sale that gives rise to the taxation of the recoupment so arising from the transaction.                                   | 1/2                              |
|      | Tax dispensations   |                                  |
|      | Since the transfer is between a wife and a husband, Pat Lemon can elect to transfer the assets at income tax values and hence defer the taxation of the potential recoupment. | 1/2                              |
|      | The potential capital gains tax can also be deferred if Pat Lemon elects to transfer the immovable assets at the values equal to the deductions available.                    | <sup>1</sup> / <sub>2</sub><br>3 |
| (ii) | Tax relief  |                                  |

Rollover relief

Capital gains tax can be deferred on the sale of the Mt Pleasant flat since part of the proceeds were applied towards the acquisition of the Monavale house. The tax is only levied on the gain applicable on the unexpended amount.

Joe Lemon is exempted from the capital gains tax on the disposal of the flat since he is an elderly taxpayer.

### Marks

| Qualifying criteria  |     |
|--|-----|
| An election for rollover must be made by Joe and Pat Lemon on or before the date on which the tax return is submitted for capital gain assessment. | 1/2 |
| Joe and Pat Lemon acquired another residence within the prescribed period which is before the end of the year following that of sale.              | 1/2 |
|  | 3   |

#### 5 Kitchen Accessories (Private) Limited

(ii)

#### (a) (i) Main purpose of taxation

The main purpose of taxation is revenue generation for the government as the taxes are required to pay for public goods and services, for example, public educational services, national defence, maintenance of infrastructure, etc.

#### Features of a good tax system

The basic taxation rules must be seen to be fair, simple and efficient. A good tax system must raise revenue in a manner that treats individuals fairly, minimises interference in economic decisions and must not impose undue costs on taxpayers and administrators. The rules must therefore be guided by the equity, efficiency and simplicity principles.

Equity principle:

Requires that tax contributions be socially just in that taxpayers should make tax contributions according to their ability to pay.

#### Simplicity principle:

The tax rules must be simple to understand, stable, predictable and reliable for making long-term plans.  $\frac{1}{2}$ 

#### Efficiency principle:

The tax system must ensure that economic decisions are diverted to best locations, thereby acting as a resource allocator.

## (ii) Direct and indirect taxation

|       | Direct tax<br>Direct taxes are paid by individuals/organisations on whom tax is levied. The tax is actually borne by the<br>individual or company and it is the same individual or company which is liable to pay that tax. | 1                                |
|-------|---|----------------------------------|
|       | Example:<br>Corporate tax   | 1/2                              |
|       | Indirect tax<br>Indirect tax is borne by someone other than the person responsible for paying it to the tax authority. The<br>tax is often included in the price of a commodity.  | 1                                |
|       | Example:<br>Value added tax   | <sup>1</sup> / <sub>2</sub><br>3 |
| (iii) | Tax avoidance and tax evasion   |                                  |
|       | Tax avoidance<br>Is legal, and involves taking advantage of enacted tax legislation in order to reduce the tax liability, for<br>example, claiming the maximum allowable deductions available.                              | 1                                |
|       | Tax evasion   |                                  |

Marks

1 2

Involves deliberate misrepresentation of facts or concealment of information by taxpayers in order to reduce the tax liability illegally, for instance, understating sales revenues.

(b) Calculation of the provisional taxable income and tax payable

|   | US\$     |     |
