

Professional Level – Essentials Module

Corporate Reporting (United Kingdom)

Tuesday 10 December 2013

Time allowed

Reading and planning: 15 minutes

Writing: 3 hours

This paper is divided into two sections:

Section A – This ONE question is compulsory and MUST be attempted

Section B – TWO questions ONLY to be attempted

Do NOT open this paper until instructed by the supervisor.

During reading and planning time only the question paper may be annotated. You must NOT write in your answer booklet until instructed by the supervisor.

This question paper must not be removed from the examination hall.

Angel Group: Statement of changes in equity for the year ended 30 November 2013

| | Share capital | Retained earnings | Other components of equity – financial assets reserve | Other components of equity – revaluation reserve | Total | Non-controlling interest | Total |
|---|---------------|-------------------|---|--|-------|--------------------------|-------|
| | \$m | \$m | \$m | \$m | \$m | \$m | \$m |
| Balance 1 December 2012 | 625 | 359 | 15 | 5 | 1,004 | 65 | 1,069 |
| Share capital issued | 225 | | | | 225 | | 225 |
| Dividends for year | | (10) | | | (10) | (6) | (16) |
| Total comprehensive income for the year | | 107 | 3 | 6 | 116 | 31 | 147 |
| Balance 30 November 2013 | 850 | 456 | 18 | 11 | 1,335 | 90 | 1,425 |

The following information relates to the financial statements of the Angel Group:

- (i) Angel decided to renovate a building which had a zero book value at 1 December 2012. As a result, \$3 million was spent during the year on its renovation. On 30 November 2013, Angel received a cash grant of \$2 million from the government to cover some of the refurbishment cost and the creation of new jobs which had resulted from the use of the building. The grant related equally to both job creation and renovation. The only elements recorded in the financial statements were a charge to revenue for the refurbishment of the building and the receipt of the cash grant, which has been credited to additions of property, plant and equipment (PPE). The building was revalued at 30 November 2013 at \$7 million.

Angel treats grant income on capital-based projects as deferred income.

- (ii) On 1 December 2012, Angel acquired all of the share capital of Sweety for \$30 million. The book values and fair values of the identifiable assets and liabilities of Sweety at the date of acquisition are set out below, together with their tax base. Goodwill arising on acquisition is not deductible for tax purposes. There were no other acquisitions in the period. The tax rate is 30%. The fair values in the table below have been reflected in the year-end balances of the Angel Group.

| | Carrying values \$million | Tax base \$million | Fair values \$million (excluding deferred taxation) |
|--------------------------------|------------------------------|-----------------------|---|
| Property, plant and equipment | 12 | 10 | 14 |
| Inventory | 5 | 4 | 6 |
| Trade receivables | 3 | 3 | 3 |
| Cash and cash equivalents | 2 | 2 | 2 |
| Total assets | 22 | 19 | 25 |
| Trade payables | (4) | (4) | (4) |
| Retirement benefit obligations | (1) | | (1) |
| Deferred tax liability | (0.6) | | |
| Net assets at acquisition | 16.4 | 15 | 20 |

- (iii) The retirement benefit is classified as a long-term borrowing in the statement of financial position and comprises the following:

| | \$m |
|------------------------------------|-----------|
| Net obligation at 1 December 2012 | 74 |
| Net interest cost | 3 |
| Current service cost | 8 |
| Contributions to scheme | (9) |
| Re-measurements – actuarial losses | 4 |
| Net obligation at 30 November 2013 | <u>80</u> |

The benefits paid in the period by the trustees of the scheme were \$6 million. Angel had included the obligation assumed on the purchase of Sweety in current service cost above, although the charge to administrative expenses was correct in the statement of profit and loss and other comprehensive income. There were no tax implications regarding the retirement benefit obligation. The defined benefit cost is included in administrative expenses.

- (iv) The property, plant and equipment (PPE) comprises the following:

| | \$m |
|---|------------|
| Carrying value at 1 December 2012 | 465 |
| Additions at cost including assets acquired on the purchase of subsidiary | 80 |
| Gains on property revaluation | 8 |
| Disposals | (49) |
| Depreciation | (29) |
| Carrying value at 30 November 2013 | <u>475</u> |

Angel has constructed a machine which is a qualifying asset under IAS 23 *Borrowing Costs* and has paid construction costs of \$4 million. This amount has been charged to other expenses. Angel Group paid \$11 million in interest in the year, which includes \$1 million of interest which Angel wishes to capitalise under IAS 23. There was no deferred tax implication regarding this transaction.

The disposal proceeds were \$63 million. The gain on disposal is included in administrative expenses.

- (v) Angel purchased a 30% interest in an associate for cash on 1 December 2012. The net assets of the associate at the date of acquisition were \$280 million. The associate made a profit after tax of \$40 million and paid a dividend of \$10 million out of these profits in the year ended 30 November 2013.
- (vi) An impairment test carried out at 30 November 2013 showed that goodwill and other intangible assets were impaired. The impairment of goodwill relates to 100% owned subsidiaries.
- (vii) The following schedule relates to the financial assets owned by Angel:

| | \$m |
|--|------------|
| Balance 1 December 2012 | 180 |
| Less sales of financial assets at carrying value | (26) |
| Add purchases of financial assets | 57 |
| Add gain on revaluation of financial assets | 4 |
| Balance at 30 November 2013 | <u>215</u> |

The sale proceeds of the financial assets were \$40 million. Profit on the sale of the financial assets is included in 'other income' in the financial statements.

- (viii) The finance costs were all paid in cash in the period.

Required:

- (a) Prepare a consolidated statement of cash flows using the indirect method for the Angel Group plc for the year ended 30 November 2013 in accordance with the requirements of IAS 7 *Statement of Cash Flows*.

Note: The notes to the statement of cash flows are not required.

(35 marks)

- (b) Angel's directors have been reviewing the financial statements of a UK entity, which have been prepared under UK GAAP and which it intends to acquire. They have observed significant differences in the way in which deferred tax is measured in the entity's financial statements.

Required:

- (i) **Describe the key differences between accounting for deferred taxation under UK GAAP and International Financial Reporting Standards.**
- (ii) **Describe how these differences would affect the accounting for deferred tax on the acquisition of Sweety above.** (9 marks)
- (c) All accounting professionals are responsible for acting in the public interest, and for promoting professional ethics. The directors of Angel feel that when managing the affairs of a company the profit motive could conflict with the public interest and accounting ethics. In their view, the profit motive is more important than ethical behaviour and codes of ethics are irrelevant and unimportant.

Required:

Discuss the above views of the directors regarding the fact that codes of ethics are irrelevant and unimportant. (6 marks)

(50 marks)

Section B – TWO questions ONLY to be attempted

- 2 (a) (i) Havana owns a chain of health clubs. In May 2013, Havana decided to sell one of its regional business divisions through a mixed asset and share deal. The decision to sell the division at a price of \$40 million was made public in November 2013 and gained shareholder approval in December 2013. It was decided that the payment of any agreed sale price could be deferred until 30 November 2015. The business division was presented as a disposal group in the statement of financial position as at 30 November 2013. At the initial classification of the division as held for sale, its net carrying amount was \$90 million. In writing down the disposal group's carrying amount, Havana accounted for an impairment loss of \$30 million which represented the difference between the carrying amount and value of the assets measured in accordance with applicable International Financial Reporting Standards (IFRS).

In the financial statements at 30 November 2013, Havana showed the following costs as provisions relating to the continuing operations. These costs were related to the business division being sold and were as follows:

- (i) A loss relating to a potential write-off of a trade receivable which had gone into liquidation. The trade receivable had sold the goods to a third party and the division had guaranteed the receipt of the sale proceeds;
- (ii) An expense relating to the discounting of the long-term receivable on the fixed amount of the sale price of the disposal group;
- (iii) A provision was charged which related to the expected transaction costs of the sale including legal advice and lawyer fees.

The directors wish to know how to treat the above transactions. (9 marks)

- (ii) Havana has decided to sell its main office building to a third party and lease it back on a 10-year lease. The lease has been classified as an operating lease. The current fair value of the property is \$5 million and the carrying value of the asset is \$4.2 million. The market for property is very difficult in the jurisdiction and Havana therefore requires guidance on the consequences of selling the office building at a range of prices. The following prices have been achieved in the market during the last few months for similar office buildings:

- (i) \$5 million
- (ii) \$6 million
- (iii) \$4.8 million
- (iv) \$4 million

Havana would like advice on how to account for the sale and leaseback, with an explanation of the effect which the different selling prices would have on the financial statements, assuming that the fair value of the property is \$5 million. (8 marks)

Required:

Advise Havana on how the above transactions should be dealt with in its financial statements with reference to International Financial Reporting Standards where appropriate.

Note: The mark allocation is shown against each of the two issues above.

- (b) A government needs to determine an appropriate regime in order to reduce the reporting burden on companies and therefore has to select an appropriate accounting framework for those companies, whilst ensuring that directors' actions are reported. Havana has heard that the UK government is to allow qualifying companies which prepare their accounts under IFRS to move to UK GAAP for any reason, provided this is no more frequently than once every five years.

Required

Discuss the apparent risks of allowing this course of action. (6 marks)

Professional marks will be awarded in question 2 for clarity and quality of presentation. (2 marks)

(25 marks)

3 (a) Bental, a listed bank, has a subsidiary, Hexal, which has two classes of shares, A and B. A-shares carry voting powers and B-shares are issued to meet Hexal's regulatory requirements. Under the terms of a shareholders' agreement, each shareholder is obliged to capitalise any dividends in the form of additional investment in B-shares. The shareholder agreement also stipulates that Bental agrees to buy the B-shares of the minority shareholders through a put option under the following conditions:

- The minority shareholders can exercise their put options when their ownership in B-shares exceeds the regulatory requirement, or
- The minority shareholders can exercise their put options every three years. The exercise price is the original cost paid by the shareholders.

In Bental's consolidated financial statements, the B-shares owned by minority shareholders are to be reported as a non-controlling interest. (7 marks)

(b) Bental has entered into a number of swap arrangements. Some of these transactions qualified for cash flow hedge accounting in accordance with IAS 39 *Financial Instruments: Recognition and Measurement*. The hedges were considered to be effective. At 30 November 2013, Bental decided to cancel the hedging relationships and had to pay compensation. The forecast hedged transactions were still expected to occur and Bental recognised the entire amount of the compensation in profit or loss.

Additionally, Bental also has an investment in a foreign entity over which it has significant influence and therefore accounts for the entity as an associate. The entity's functional currency differs from Bental's and in the consolidated financial statements, the associate's results fluctuate with changes in the exchange rate. Bental wishes to designate the investment as a hedged item in a fair value hedge in its individual and consolidated financial statements. (6 marks)

(c) On 1 September 2013, Bental entered into a business combination with another listed bank, Lental. The business combination has taken place in two stages, which were contingent upon each other. On 1 September 2013, Bental acquired 45% of the share capital and voting rights of Lental for cash. On 1 November 2013, Lental merged with Bental and Bental issued new A-shares to Lental's shareholders for their 55% interest.

On 31 August 2013, Bental had a market value of \$70 million and Lental a market value of \$90 million. Bental's business represents 45% and Lental's business 55% of the total value of the combined businesses.

After the transaction, the former shareholders of Bental excluding those of Lental owned 51% and the former shareholders of Lental owned 49% of the votes of the combined entity. The Chief Operating Officer (COO) of Lental is the biggest individual owner of the combined entity with a 25% interest. The purchase agreement provides for a board of six directors for the combined entity, five of whom will be former board members of Bental with one seat reserved for a former board member of Lental. The board of directors nominates the members of the management team. The management comprised the COO and four other members, two from Bental and two from Lental. Under the terms of the purchase agreement, the COO of Lental is the COO of the combined entity.

Bental proposes to account for the transaction as a business combination and identify Lental as the acquirer. (10 marks)

Required:

Discuss whether the accounting practices and policies outlined above are acceptable under International Financial Reporting Standards.

Note: The mark allocation is shown against each of the three issues above.

Professional marks will be awarded in question 3 for clarity and quality of presentation. (2 marks)

(25 marks)

- 4 (a) Due to the complexity of International Financial Reporting Standards (IFRS), often judgements used at the time of transition to IFRS have resulted in prior period adjustments and changes in estimates being disclosed in financial statements. The selection of accounting policy and estimation techniques is intended to aid comparability and consistency in financial statements. However, IFRS also place particular emphasis on the need to take into account qualitative characteristics and the use of professional judgement when preparing the financial statements. Although IFRS may appear prescriptive, the achievement of all the objectives for a set of financial statements will rely on the skills of the preparer. Entities should follow the requirements of IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* when selecting or changing accounting policies, changing estimation techniques, and correcting errors.

However, the application of IAS 8 is additionally often dependent upon the application of materiality analysis to identify issues and guide reporting. Entities also often consider the acceptability of the use of hindsight in their reporting.

Required:

- (i) **Discuss how judgement and materiality play a significant part in the selection of an entity's accounting policies.**
- (ii) **Discuss the circumstances where an entity may change its accounting policies, setting out how a change of accounting policy is applied and the difficulties faced by entities where a change in accounting policy is made.**
- (iii) **Discuss why the current treatment of prior period errors could lead to earnings management by companies, together with any further arguments against the current treatment.**

Credit will be given for relevant examples.

Note: The total marks will be split equally between each part. (15 marks)

- (b) In 2013, Zack, a public limited company, commenced construction of a shopping centre. It considers that in order to fairly recognise the costs of its property, plant and equipment, it needs to enhance its accounting policies by capitalising borrowing costs incurred whilst the shopping centre is under construction. A review of past transactions suggests that there has been one other project involving assets with substantial construction periods where there would be a material misstatement of the asset balance if borrowing costs were not capitalised. This project was completed in the year ended 30 November 2012. Previously, Zack had expensed the borrowing costs as they were incurred. The borrowing costs which could be capitalised are \$2 million for the 2012 asset and \$3 million for the 2013 asset.

A review of the depreciation schedules of the larger plant and equipment not affected by the above has resulted in Zack concluding that the basis on which these assets are depreciated would better reflect the resources consumed if calculations were on a reducing balance basis, rather than a straight-line basis. The revision would result in an increase in depreciation for the year to 30 November 2012 of \$5 million, an increase for the year end 30 November 2013 of \$6 million and an estimated increase for the year ending 30 November 2014 of \$8 million.

Additionally, Zack has discovered that its accruals systems for year-end creditors for the financial year 30 November 2012 processed certain accruals twice in the ledger. This meant that expenditure services were overstated in the financial statements by \$2 million. However, Zack has since reviewed its final accounts systems and processes and has made appropriate changes and introduced additional internal controls to ensure that such estimation problems are unlikely to recur.

All of the above transactions are material to Zack.

Required:

Discuss how the above events should be shown in the financial statements of Zack for the year ended 30 November 2013. (8 marks)

Professional marks will be awarded in question 4 for clarity and quality of presentation. (2 marks)

(25 marks)

End of Question Paper
