Introduction
These sample questions show the likely style and range of **constructed response questions** that could be asked in the live exam.

You should use these questions to become familiar with the question types and the features and functionality contained within the live exam.

This exam is reflective of the constructed response section of the live exam in terms of how it will be structured and assessed, but has some differences:

- There is no timer in this exam however the live exam will have a time limit.
- In the live exam your answers to the constructed response questions will be expert-marked. In this exam you should use the relevant solution material, available from the Past Exam section of the ACCA website, to assess your performance.
- In the live exam you will be able to highlight and strikethrough text in the question scenario (this feature is not currently available in this exam).

Sample exam questions

Scenario 1

Bun Co is a bakery which also owns two shops/cafés. Over the last two years, the company has experienced declining profitability due to increased competition and so the directors wish to investigate if this is a sector-wide problem. Consequently, they have acquired equivalent ratios for the sector, some of which have been reproduced below.

### Sector averages for the year ended 30 June 20X7:

Other relevant information to Bun Co:

1. In 20X6, Bun Co acquired a popular brand name. At 31 December 20X7, the brand represented 20% of non-current assets. The remaining 80% of non-current assets comprises of the property from which Bun Co operates its bakery and shops. This property is owned by Bun Co and has no directly associated finance. The property was revalued in 20X4.

2. In the year ended 31 December 20X7, Bun Co began offering discounted meal deals to customers. Bun Co hoped this strategy would help to reduce perishable inventory and reduce inventory holding periods.

3. In January 20X8, it was decided to discount some slow-moving seasonal inventory which had a selling price of $1.5m. Under normal circumstances, these products have a gross profit margin of 20%. The inventory was sold in February 20X8 for 50% of what it had cost Bun Co to produce. The financial statements for the year ended 31 December 20X7 were authorised for issue on 15 March 20X8.
Scenario 1: requirements

(a) Adjust for the information in note (3) and calculate the 20X7 sector average equivalent ratios for Bun Co.

(7 marks)

(b) Assess the financial performance and position of Bun Co for the year ended 31 December 20X7 in comparison with the sector average ratios.

(10 marks)

(c) Explain three possible limitations of the comparison between Bun Co and the sector average ratios provided.

(20 marks)
Scenario 2

Financial Reporting (FR) Sample Questions - September/December 2019

This scenario relates to two requirements.

On 1 April 20X4, Runner Co acquired 80% of Jogger Co’s equity shares when the retained earnings of Jogger Co were $19.5m. The consideration consisted of cash of $42.5m paid on 1 April 20X4 and a further cash payment of $21m, deferred until 1 April 20X5. No accounting entries have been made in respect of the deferred cash payment. Runner Co has a cost of capital of 8%. The appropriate discount rate is 0.926.

The draft, summarised statements of financial position of the two companies at 31 March 20X5 are shown below:

(i) Runner Co’s policy is to value the non-controlling interest at fair value at the date of acquisition. The fair value of the non-controlling interest in Jogger Co on 1 April 20X4 was estimated at $13m.

The fair values of Jogger Co’s other assets, liabilities and contingent liabilities at 1 April 20X4 were equal to their carrying amounts with the exception of a specialised piece of plant which had a fair value of $10m in excess of its carrying amount. This plant had a ten year remaining useful life on 1 April 20X4.

(ii) In December 20X4, Jogger Co sold goods to Runner Co for $6.4m, earning a gross margin of 15% on the sale. Runner Co still held $4.8m of these goods in its inventories at 31 March 20X5.

Jogger Co still had the full invoice value of $6.4m in its trade receivables at 31 March 20X5; however, Runner Co’s payables only showed $3.4m as it made a payment of $3m on 31 March 20X5.

Note: See page 12 for example view of full CBE constructed response workspace
Requirements for Scenario 2

(a) Prepare the consolidated statement of financial position for Runner Co as at 31 March 20X5.

(b) Runner Co acquired 30% of Walker Co’s equity shares on 1 April 20X5 for $13m. Walker Co had been performing poorly over the last few years and Runner Co hoped its influence over Walker Co would help to turn the company around. In the year ended 31 March 20X6 Walker Co made a loss of $30m. Runner Co has no contractual obligation to make good the losses relating to Walker Co.

Explain how Walker Co should be accounted for in the consolidated Statement of financial position of Runner Co for the year ended 31 March 20X6. Your answer should also include a calculation of the carrying amount of the investment in the associate at that date.
