Introduction

These sample questions show the likely style and range of **constructed response questions** that could be asked in the live exam. You should use these questions to become familiar with the question types and the features and functionality contained within the live exam.

This exam is reflective of the constructed response section of the live exam in terms of how it will be structured and assessed, but has some differences:

- There is no timer in this exam however the live exam will have a time limit.
- In the live exam your answers to the constructed response questions will be expert-marked. In this exam you should use the relevant solution material, available from the Past Exam section of the ACCA website, to assess your performance.
- In the live exam you will be able to highlight and strikethrough text in the question scenario (this feature is not currently available in this exam).

Sample exam questions

Scenario 1

Yumi Co owns a number of restaurants. It is a well-established company, and its restaurants have gained a favourable reputation for the quality of their meals.

Yumi Co’s restaurants are all set in rural locations, where there is limited competition and this enabled them to develop a loyal customer base. Restaurants design their own menus and décor to fit with the requirements of their local market.

Yumi Co has been consistently profitable, however as is the case across the restaurant industry, profit margins are quite low and there is still a constant need for Yumi Co to monitor costs.

One of Yumi Co’s restaurants is located in the small town of Cowly. Cowly has recently been the location for the filming of a popular television series and visitor numbers to the town have increased significantly as a result. Yumi Co’s restaurant in Cowly has noticed a similar increase in customer numbers.

At the start of the current month a new restaurant opened in Cowly. The manager of Yumi Co’s restaurant in Cowly has expressed concerns about the impact this new competitor will have on their ability to achieve profit targets for the rest of the year.

Budgets for all of Yumi Co’s restaurants are prepared by the head office. At the start of each year, restaurant managers are given an annual budget, which is split into months. At the end of each month, the manager receives a statement comparing actual monthly performance against budget.

The statement for the Cowly restaurant for the most recent completed month is as follows:

<table>
<thead>
<tr>
<th></th>
<th>Actual</th>
<th>Budget</th>
<th>Variance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of customers</td>
<td>1,800</td>
<td>1,500</td>
<td></td>
</tr>
<tr>
<td>Revenue</td>
<td>87,300</td>
<td>75,000</td>
<td>12,300 F</td>

<td>600 A</td>
</tr>
<tr>
<td>overheads</td>
<td>2,250</td>
<td>1,500</td>
<td>750 F</td>
</tr>
</tbody>
</table>

Notes:
1. Rent, rates and other overheads are apportioned to its restaurants by Yumi Co’s head office, based on a fixed annual charge.
2. All other budgeted costs are treated as variable costs, based on the expected number of customers.

Yumi Co currently adopts an incremental approach to budgeting, with the annual budget figures for each year being based on the previous year’s figures. However, a new finance director has recently joined the company, and he has questioned whether this is suitable for all Yumi Co’s restaurants.

The new finance director has also suggested that the company should adopt a more participative approach to budgeting.
Scenario 1: requirements

(a) (i) Prepare a flexed budget for the Cowly restaurant.

(ii) With reference to your answer from part (i), explain the main weaknesses in the current monthly budget statements issued to the restaurants as a basis for managing performance.

(b) Discuss whether an incremental approach to budgeting is appropriate for Yumi Co.

(c) Define a participative approach to budgeting and explain the potential advantages and disadvantages of introducing this approach at Yumi Co.
Scenario 2

The following scenario relates to one requirement.

Robinholt University is one of the largest and most popular universities in the country of Richpol. It had 27,000 registered students in 20X6, whereas in 20X5, the number of registered students was only 24,000. Robinholt University managed to increase its student numbers in 20X6 by making the entry requirements for students slightly lower than in previous years. All courses at the university last for three years.

Robinholt University has five strategic aims:

1. To provide education which promotes intellectual initiative and produces confident and ambitious graduates who have reached the highest academic standards to prepare them for success in life and the workplace
2. To provide an organised, efficient learning environment with access to cutting-edge technology and facilities
3. To be a leader in sustainable business practices which protect the environment and support local people
4. To provide attractive, innovative conference and event facilities, attracting clients both nationally and internationally
5. To be recognised both nationally and internationally for the scope and relevance of their research

Extracts from the university’s income statement for the last two years are as follows:

<table>

Scenario 2 (continued)

Every year, final year students complete an external survey run by the National Organisation for Students. In this, they have to agree or disagree with statements made. Extracts from this for the last two years are shown below (the percentage rates show the number of students who agreed with the statements made):

<table>
<thead>
<tr>

<td></td>
<td></td>
</tr>
<tr>
<td>6) Overall, I am satisfied with the quality of the course</td>
<td>81%</td>
<td>83%</td>
</tr>
</tbody>
</table>

The ‘overall satisfaction’ percentage is used by the Education Authority to set the maximum level of tuition fees that a university can charge each year and is seen as the main measure of success both internally and externally.

<td>Staff retention rate</td>
<td>40:1</td>
<td>35:1</td>
</tr>
<tr>
<td>Staff retention rate</td>
<td>75%</td>
<td>90%</td>
</tr>
</tbody>
</table>

The staff retention rate in 20X5 was consistent with previous years. Data gathered from students who graduated in 20X5 showed that 65% of students found a graduate job within one year of leaving compared to 68% of 20X4’s graduates.

In 20X5, Robinholt University won the ‘Green Environmental’ award for their campuses, which all have extensive recycling facilities. Students were also involved in a local ‘Grow to Give’ food sharing project that year, which provided thousands of pounds worth of fresh produce to food banks offering food to poorer residents. Due to staff shortages, the university was not involved in this project in 20X6. The recycling bins have also been abandoned because of the cost of using them.

Every year, the University Research Council issues a range of prestigious awards for contributions to research. One of Robinholt University’s main competitors in the area won an award in 20X5 for their contribution to some pioneering research on genetics. Robinholt University has yet to win an award for research. However, in 20X5 it did win an ‘Innovation’ award for its new, innovative conference facilities which have attracted a number of new clients in the last year.
Requirements for Scenario 2

(a) Using Robinholt University’s five strategic aims, assess its performance for 20X6.

Note: There are 4 marks available for calculations and 16 marks for discussion.
