Introduction

These sample questions show the likely style and range of constructed response questions that could be asked in the live exam.

You should use these questions to become familiar with the question types and the features and functionality contained within the live exam.

The practice exam is reflective of the constructed response section of the live exam but has some differences:

- The live exam will be timed, however there is no time limit in this exam.
- Once you have started this exam you are able to leave at any time by closing the browser window. When you return, anything you have entered into the response options will be saved and you can continue sitting the exam.
- In the live exam your answers to the constructed response questions will be expert-marked. At the end of this exam you should use the solution material provided to assess your performance in the constructed response questions.
- You will be able to access solution material at the end of this exam when using the Self-Marking resources which include a Marking Guide and/or Sample Answer for each question. If you wish to access these without completing the questions, click on "End Exam" on the Item Review Screen and navigate to the Marking tab on the Dashboard to Self-Mark.

Sample exam questions

Scenario 1

Pumice Co plans to expand its business operations by opening several new outlets at a cost of $8m, financed by an issue of loan notes. The company currently generates credit sales of $80.768m before cost of sales of $27.700m. All sales are on credit. The current statement of financial position of Pumice Co is as follows:

<table>

<tr>
<td><strong>Total equity and liabilities</strong></td>
<td><strong>71,190</strong></td>
</tr>
</tbody>
</table>

Note: See page 19 for example view of full CBE constructed response workspace
Pumice Co expects that the expansion will increase credit sales by 18.7%, with cost of sales being 33% of credit sales and profit after tax being $6.818m. Non-current assets will increase by 11%.

The bank has demanded that Pumice Co's overdraft be reduced to $3m and the company expects its cash balance to be $700,000 after the expansion.

Pumice Co has been receiving complaints from its suppliers about late payment and the company plans to improve its working capital management as part of the expansion; it expects that the following working capital ratios will result:

<table>
<thead>
<tr>
<th>Ratio Description</th>
<th>Time Period</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inventory holding period</td>
<td>50 days</td>
</tr>
<tr>
<td>Trade receivables payment period</td>
<td>60 days</td>
</tr>
<tr>
<td>Trade payables payment period</td>
<td>60 days</td>
</tr>
</tbody>
</table>

The finance director of Pumice Co wishes to investigate how the expansion will change the following ratios:

(i) trade payables payment period;
(ii) current ratio; and
(iii) revenue/net working capital ratio (defining net working capital as inventory plus trade receivables less trade payables).

Assume that there are 360 days in a year.
Scenario 1: requirements

Using the information provided:

(a)(i) Prepare a forecast statement of financial position for Pumice Co; and

(ii) Calculate the effect of the proposed expansion on the working capital ratios listed by the finance director.

Note: See page 19 for example view of full CBE constructed response workspace

(b) Discuss the ways in which implementing the proposed changes in working capital represent:

(i) Changes in working capital investment policy for Pumice Co; and

(5 marks)

(ii) Changes in working capital funding policy for Pumice Co.

Scenario 2

This scenario relates to six requirements.

LaForge Co is a listed company which designs and manufactures air-conditioning units, which are then sold through third party retailers and distributors. Economic growth in a number of Asian countries has increased the demand for its products and LaForge Co wishes to target these markets in order to generate sales and profit growth.

To target these markets, LaForge Co needs new machinery which will require investment of $25.48m.

Two options for raising the finance are being considered:

1. A rights issue, at a discount of 30% on the current share price of $2.60 per share.
2. An issue of 6% loan notes, redeemable at nominal value of $100, in ten years’ time.

LaForge Co’s P/E ratio is 11 times and this is expected to remain unchanged, whichever financing option is chosen.

Extracts from LaForge Co’s most recent financial statements are as follows:

<table>
<thead>
<tr>
<th></th>
<th>$m</th>
</tr>
</thead>
<tbody>
<tr>
<td>Profit from operations</td>
<td>25.50</td>
</tr>
<tr>
<td>Profit after tax</td>
<td>16.56</td>
</tr>
<tr>
<td>Share capital ($0.50 per share nominal)</td>
<td>35.00</td>
</tr>
</tbody>
</table>

Without the new investment, the forecast profit from operations for the coming year is expected to be the same as the previous year’s actual result. If the investment is undertaken, the forecast profit from operations for the coming year is expected to increase by $4.5m.

LaForge Co pays tax at 20%.
Requirements for Scenario 2

(a) For the rights issue, calculate the following:

(i) The theoretical ex-rights price per share; and

(ii) The value of a right per existing share.

Note: See page 19 for example view of full CBE constructed response workspace
(b) Assuming that the investment goes ahead, calculate LaForge Co’s forecast earnings per share, for the coming year AND the resulting share price, if it finances the investment using each of these alternatives:

(i) The rights issue; and  
(ii) The loan notes.

(c) Discuss the ways in which a company can issue new equity shares.

(5 marks)

Note: See page 19 for example view of full CBE constructed response workspace
At a recent board meeting to discuss the financing options, one of the directors suggested reducing the forthcoming dividend. In the past few years, LaForge Co has consistently paid an annual dividend of $0.08 per share. Its shareholders include both financial institutions and individuals.

(d) Discuss and recommend whether LaForge Co should raise the finance it requires by reducing its annual dividend.
