

How to approach the Advanced Audit and Assurance (AAA) exam

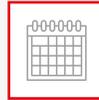

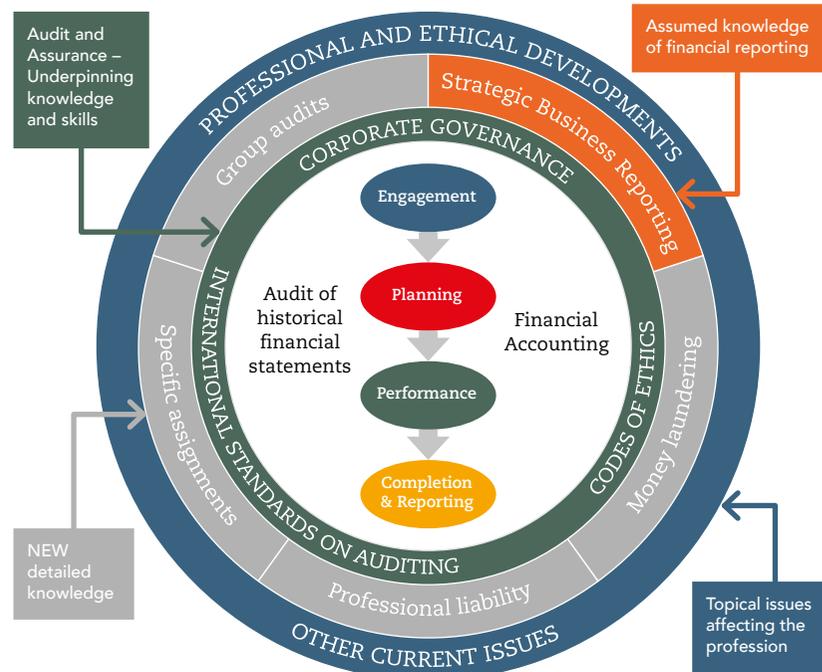

AAA builds on the **Audit and Assurance** and **Strategic Business Reporting (SBR)** exams, by introducing more complex topics and covering the basic topics from different angles to reflect the challenges auditors will face in their professional life. Current issues, exposure drafts and developments in audit including emerging technologies also feature. Questions are set in the context of single entities, groups and private or public sector organisations.

To prepare for AAA effectively you need to understand the nature of the exam and what you will be asked to do.

AAA – In Essence

The aim of the syllabus is to analyse, evaluate and conclude on the assurance engagement and other audit and assurance issues in the context of best practice and current developments.
