

# Get Connected to Kaplan with our new Digital Extra learning modules

Kaplan's new Digital Extra learning modules give you the opportunity for your ACCA courses to be powered by Kaplan.

Benefitting from our expertise in producing award-winning digital solutions for ACCA courses, we are pleased to offer our key partners the opportunity to purchase modules from Kaplan's OnDemand course, to enhance your ACCA classroom courses.

By connecting to Kaplan's new online package, you can create your own blended flexible study options for your students, using bite-size tutor-led video lectures and activities to link topics together and embed key concepts structured around Kaplan's exam-focused integrated workbooks.

Every module and topic has been through a detailed instructional design process, which means we've considered how to best explain each area. In addition, every module is scripted and links the on screen animations with the graphics found within the integrated workbook.

This provides a high-quality online learning experience, which is so much more than a live recorded tutor session, or even a tutor narrating highlighted text book visuals.

We can offer you links to the modules to embed into your own LMS or you can access them via our MyKaplan portal.

For more information and for pricing contact your local Kaplan representative.

## Become Powered by Kaplan to:

- Benefit from our flexible teaching, learning and delivery options to meet your needs
- Be supported by Kaplan's ACCA-Approved study materials and Lecturers Resources, written by expert classroom tutors who know the key to exam success
- Get connected to Kaplan's Digital Extra learning modules, helping you to convert your existing traditional classroom provision to a sophisticated blended learning approach
- Enable you and your students to benefit from Kaplan's award-winning online technology and teaching, adding colour and insight to your face-to-face courses

Your growth is our growth
